

Adarsh.K.M

C program to implement parameter passing technique.

1) Call by Value.

Algorithm

1. Start
2.  $a = b;$
3. Output in function  
 $a = \_$  and  $b = \_$ .

4. Stop  
 $\text{func}(\text{int } a, \text{int } b)$

1. Start

2. input  $x = 6, y = 8;$

3.  $\text{func}(x, y);$

4. Output in main  $x = \_$   
and  $y = \_$

5. Stop

Flowchart

$\text{func}(\text{int } a, \text{int } b)$
